

# Diamond

**Diamond** is a clear, ready-to-use, sprayable, VOC compliant, magnesium & zinc fluosilicate penetrating liquid chemical hardener and dustproofing compound, which will increase the abrasion resistance of floors subjected to pedestrian and normal vehicle traffic. Diamond penetrates to seal, harden, dustproof, and densify the concrete slab. As a result, Diamond treated floors last longer, are easier to clean and maintain, and remain dust-free for years after application.

## ADVANTAGES

- ✓ Non Flammable
- ✓ Magnesium & Zinc Fluosilicate
- ✓ Odorless
- ✓ Reduces Porosity in Concrete
- ✓ Water Based
- ✓ USDA Approved
- ✓ LEED Credits
- ✓ Colorless - Will Not Change the Appearance of Concrete
- ✓ Compatible with Flooring Adhesives
- ✓ Dustproofs Concrete
- ✓ Basic Chemical Resistance
- ✓ Resists Staining
- ✓ Helps to Prevent Efflorescence
- ✓ Easy to Maintain & Clean Floors

## USES

- ✓ Dustproofing Aged Concrete Slabs
- ✓ Diamond Floor Polishing
- ✓ Densify Slabs
- ✓ Use wherever a magnesium & zinc fluosilicate is specified

## PACKAGING

- ✓ 5-gallon units
- ✓ 55-gallon drums
