Re: LEED Systems – EasiKleen EM

In regard to LEED systems, EasiKleen EM, as manufactured by Kaufman Products, is eligible for the following credits:

MR Credit 1.1: Building Reuse: Maintain 75% of Existing Walls, Floors & Roof

MR Credit 1.2: Building Reuse: Maintain 95% of Existing Walls, Floors & Roof

The intent of this credit is to preserve and make usable the existing concrete slab. These products are used to clean, re-bond, and/or densify/dustproof existing concrete allowing it to become functional again.

MR Credit 5.1: Regional Materials: 10% Extracted, Processed & Manufactured Regionally

MR Credit 5.2: Regional Materials: 20% Extracted, Processed & Manufactured Regionally

The intent of the Materials & Resources Credits 5.1 and 5.2 are to increase demand for building materials and products that are extracted and manufactured within the region, thereby supporting the use of indigenous resources and reducing the environmental impact from transportation. Kaufman Products is based in Baltimore, MD, where all materials are manufactured. If materials shipped to jobsites or to our distributor's warehouses are within 500 miles of Baltimore, Maryland this credit would apply.

I hope that I have answered your questions, however you have further concerns please do not hesitate to contact me at anytime.

Sincerely yours,
KAUFMAN PRODUCTS, INC.
