Re: LEED Systems – Kleenlease 28

In regard to LEED systems, Kleenlease 28, as manufactured by Kaufman Products, is eligible for the following credits:

MR Credit 4.1 Recycled Content 10%

MR Credit 4.2 Recycled Content 20%

The intent of this credit is to increase the demand for building products that utilize recycled materials, which reduces the impact from extracting and manufacturing virgin materials. To apply for credit 4.1, the sum of post-consumer recycled content plus $\frac{1}{2}$ of the pre-consumer content constitutes at least 10% of the total value of the materials. To apply for credit 4.2, the sum of post-consumer recycled content plus $\frac{1}{2}$ of the pre-consumer recycled content constitutes at least 20% of the total value of the materials.

MR Credit 5.1: Regional Materials: 10% Extracted, Processed & Manufactured Regionally

MR Credit 5.2: Regional Materials: 20% Extracted, Processed & Manufactured Regionally

The intent of the Materials & Resources Credits 5.1 and 5.2 are to increase demand for building materials and products that are extracted and manufactured within the region, thereby supporting the use of indigenous resources and reducing the environmental impact from transportation. Kaufman Products is based in Baltimore, MD, where all materials are manufactured. If materials shipped to jobsites or to our distributor's warehouses are within 500 miles of Baltimore, Maryland this credit would apply.

I hope that I have answered your questions, however you have further concerns please do not hesitate to contact me at anytime.

Sincerely yours,

KAUFMAN PRODUCTS, INC.

Alex Kaufman
President
