

# SureKote 100U

**SureKote 100U** is a two-component, non-yellowing, aliphatic urethane coating for high-performance flooring. SureKote 100U provides excellent gloss retention and will continue to retain a high gloss through many years of service. Available in three standard colors of clear, beige, and light grey, SureKote 100U has non-chalking properties combined with excellent abrasion, chemical, solvent, and good heat resistance properties. All these features make SureKote 100U ideal as a stand-alone coating or as a top-coat to our epoxy coatings

## ADVANTAGES
