

Tycron Met 200

Tycron Met 200 is a line of heavy-duty, high quality, metallic aggregate, shake-on hardeners that are available in an assortment of color choices for new concrete floors. In addition to specially processed metallic aggregates, Tycron Met 200 includes cementitious binders, long proven water reducing agents and plasticizers, as well as other proprietary ingredients. Tycron Met 200 will provide superior durability, greater abrasion resistance, and lower maintenance costs when used in industrial applications. Floors treated with Tycron Met 200 will stand up to years of punishment without dusting or disintegrating.
