

# Tycron Met

**Tycron Met** is line of high quality, metallic aggregate, shake-on hardeners that are available in an assortment of color choices for new concrete floors. In addition to specially processed metallic aggregates, Tycron Met includes cementitious binders, long proven water reducing agents and plasticizers, as well as other proprietary ingredients. Tycron Met will provide increased long term durability, greater abrasion resistance, and lower maintenance costs when used in industrial applications. Floors treated with Tycron Met will stand up to years of punishment without dusting or disintegrating.
