SAC E

Description

SAC E (Sprayer & Applicator Cleaner) is an emulsified version of SAC. The petroleum solvents are emulsified in a water solution. It is designed for use in cleaning out sprayers that were used for applying emulsified concrete curing compounds by Kaufman Products. It is much safer and easier to use than regular SAC and is completely non-flammable.

Uses

It is designed to clean and flush out sprayers used for applying water-emulsion concrete curing compounds. Due to the unique formulation, the product does not dry too quickly, which allows for sufficient time to clean out the sprayer.

Directions

Surface Preparation

Empty sprayer of all curing compounds and add approximately ½ gallon of SAC E to sprayer. Close lid and shake sprayer up and down so that the cleaner comes into contact with the inside surfaces. Pump up sprayer and spray out contents into their respective container for re-use later.

Packaging

55 gallon drum
5 gallon pail
4/1 gallon case

Leeds

This product may help contribute to Leeds credits MR 5.1 and MR 5.2.

Precautions

SAC E is not flammable or combustible. It can freeze, however, if allowed to thaw out it will mix back into solution. Read Material Safety Data before using.
