

LEADING THE WAY IN CONCRETE TREATMENTS

**PRODUCTS
BUILT TO
WITHSTAND
WINTER**

MAKE COLD WEATHER JOB DELAYS A THING OF THE PAST WITH OUR EXCELL PRODUCT LINE.

These products are specifically formulated for cold weather—allowing you to work year round! Contact us today for a free sample.

EXCELL

Is a concentrated solution of chemically active accelerating agents that are added to the mortar to speed the set during winter months. Excell will help reduce construction costs by eliminating cold weather delays.

WHAT TO KNOW

- 0 g/l VOC content
- Calcium chloride solution
- Faster set times
- Improved workability
- For use with white, pigmented, or gray concrete
- Available in 1-gallon jugs, 5-gallon pails, and 55-gallon drums

EXCELL NC 80

Is a non-Calcium Chloride winter admixture, formulated to help speed the set of mortar during winter months. We don't add chloride ions, which means that it is safe to use Excell NC 80 when the mortar will be in contact with steel products.

WHAT TO KNOW

- 0 g/l VOC content
- Non-calcium chloride formulation
- Less than 0°F freeze point
- No added chloride ions
- Faster set times
- Improved workability
- For use with white, pigmented, or gray concrete
- May be placed in contact with steel and/or wire mesh
- Available in 1-gallon jugs, 5-gallon pails, and 55-gallon drums
