

# Expose

**Expose** is a chemical retarder that provides a simple, economical method of exposing aggregates for freshly poured concrete flat work. Due to the controlled penetration, Expose allows the concrete underneath to harden normally, while retarding the surface only. After the concrete has set, the retarded mortar surface can be washed off with a stream of water and a stiff bristled brush. Expose produces consistent, repeatable, beautiful non-slip surfaces without hot spots for depths of up to 3/16".

## ADVANTAGES

- ☑ Contains Zero VOCs
- ☑ Non-Flammable
- ☑ Ideal with Kystal Brown Series products to highlight brown aggregates
- ☑ Odorless
- ☑ Water-Based
- ☑ Spray Applied
- ☑ CRD C-94
- ☑ LEED Credits
- ☑ May be Used with all Krystal Series Products

## USES

- ☑ Driveways
- ☑ Patios
- ☑ Golf Course Cart Paths
- ☑ Decorative Concrete
- ☑ Walkways
- ☑ Skid Resistance

## PACKAGING

- ☑ 1-gallon jugs
- ☑ 5-gallon pails
- ☑ 55-gallon drums
