Concrete Treatments

LEADING THE WAY IN CONCRETE TREATMENTS FOR OVER 50 YEARS!

## FORM RELEASE AGENTS

Kaufman Products provides a broad range of concrete form release agents that work to produce a consistent release, without causing buildup on the forms. Our full line of products all contribute to LEED points for green construction projects. Contact us today for a free sample.

**FormKote OTC —** economical, general-purpose, chemically reactive form release agent that meets the rigid VOC requirements from LADCO, OTC and the EPA.

**FormKote Emulsion —** water-based, ready-to-use form release agent that may be used with most forming systems, is freeze-thaw stable and meets the rigid VOC requirements from LADCO, OTC and the EPA.

**FormKote OTC Concentrate —** a concentrated and chemically reactive concrete form release agent that meets the rigid VOC requirements from LADCO, OTC and the EPA.

**SureForm 20 OTC —** an architectural grade, chemically reactive form release agent, formulated with increased lubricity agents to create the perfect release. Meets LADCO, OTC, and EPA VOC regulations.

**KleenLease 28/KleenLease 28 OTC —** architectural grade, chemically reactive, drying-type form release agents that are chemically engineered to reduce the presence of bugholes and other surface imperfections. KleenLease 28 is available in both the original version and a low-VOC formulation.

**SeasonAL —** a water-based, highly alkaline, chemically reactive and ready-to-use aluminum form seasoning agent that meets the rigid VOC requirements from LADCO, OTC and the EPA.
