

Krystal Refresh

Krystal ReFresh is our all acrylic curing, sealing, and re-finishing compound, designed to meet the Federal VOC content regulations from the EPA. Krystal ReFresh is resistant to yellowing from UV exposure, making it ideally suited for curing freshly placed exterior architectural concrete where yellowing is unacceptable. Krystal ReFresh is ideal as a re-sealer due to its excellent breathability, which prevents the formation of a white haze due to ground water rising through the slab. Krystal ReFresh will provide a wet-look or glossy finish, and may be used with our non-slip additive, SureGrip, for skid resistance. Furthermore, Krystal ReFresh is formulated to include our proprietary Air-Release Technology, which helps to release entrapped air or bubbles from application.

ADVANTAGES

- ✓ Wet-Look/Glossy Appearance; Specular Gloss of 90% (ASTM D-523)
- ✓ Enhances Proper Curing of Concrete to Prevent Shrinkage Cracks, Dusting, & Low Strengths
- ✓ Durable Film Development Makes Clean Up Easier
- ✓ Extended Evaporation Rate
- ✓ Air-Release Technology for Easy Application
- ✓ More Breathable = Less Post Whitening
- ✓ Non-Yellowing
- ✓ No Acetone
- ✓ May Contribute to LEED Points

COMPLIANCES

- ✓ USDA Compliant Post Cure
- ✓ Federal EPA VOC Content Regulations

USES

- ✓ Decorative Concrete
- ✓ Exterior Residential Concrete
- ✓ Re-Sealing Existing Exterior Concrete

PACKAGING

- ✓ 1-Gallon Cans
- ✓ 5 Gallon Pails
- ✓ 55-Gallon Drums
