

# SureBond

**SureBond** is a high performance, low viscosity water-based acrylic admixture, and bonding agent for concrete. When SureBond is used to bond freshly poured concrete or mortar to existing substrates, the two become one. They are intimately anchored together. Whether you are bonding a new floor to an existing one or bonding subsequently poured concrete for construction joints, improved adhesion is always achieved. SureBond may also be added to cementitious toppings, patches, stuccos, underlayments, paints, slurries, etc. which will increase strengths, reduce the amount of water required, and the whole mixture becomes self-curing.

## ADVANTAGES

- ☑ Contains Zero VOCs
- ☑ Self-curing
- ☑ Water & chemical resistant
- ☑ Increased strengths
- ☑ Multi-purpose
- ☑ Will not discolor white cement mixtures
- ☑ Reduces maintenance costs
- ☑ Interior or exterior use
- ☑ Above or below grade
- ☑ Superior adhesion
- ☑ Does not produce vapor barrier

## USES

- ☑ Bond Old to New Concrete or Repair Mortars
- ☑ Bond Old Concrete to Old Concrete
- ☑ Admixture for Mortars, Toppings, Patches, Stuccos, Etc.

## COMPLIANCES

- ☑ ASTM C-1059, Type 2
- ☑ ASTM C-932, Type 2

## PACKAGING

- ☑ 1-gallon jugs
- ☑ 5-gallon pails
- ☑ 55-gallon drums
