Certification

This is to certify that Wall Patch is a single component, quick setting, cementitious patching and finishing compound that is used to fill and smooth interior and exterior vertical concrete surfaces prior to sealing or painting. Trowel applied, Wall Patch is composed of special portland cements, silica aggregates, and workability & water reducing agents. When mixed with potable water, Wall Patch becomes a creamy and smooth mortar that is easy to use when filling in surface defects, chips, honeycombs, bug holes, etc.

Wall Patch is manufactured by Kaufman Products, Inc., Baltimore, Maryland and complies with all aspects of ARRA Section 1605 Buy American Act requirements.

I trust this meets with your approval and if I can be of any further assistance, please do not hesitate to contact me.

Sincerely yours,

KAUFMAN PRODUCTS, INC.

Alex S. Kaufman
President
