

Product Description

DR Cure is a water-based, dissipating resin concrete curing compound, which meets ASTM C-309, Type I Classes A & B. DR Cure is designed to break down and wear off through oxidation, or dissipation, from UV radiation, weathering, and abrasion. As a result, proper adhesion of subsequent floor coverings will not be affected once the membrane dissipates. Unique to KAUFMAN PRODUCTS, DR Cure is freeze-thaw resistant, which prevents the loss of material during colder temperatures because it may be thawed out and re-used without sacrificing quality.

INVENTORY AND SCREENING NOTES:

Special Conditions applied: [BiologicalMaterial]

This HPD was produced using primary information from the manufacturer, including CAS numbers and SDS when needed. The manufacturer has made every effort to report the substances in this product to the listed threshold. This is a voluntary, self-reported effort. Any errors or omissions shall be considered a human error and therefore reported to the manufacturer. The manufacturer shall not be liable for omissions.

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: [www.hpd-collaborative.org/hpd-2-3-standard](http://www.hpd-collaborative.org/hpd-2-3-standard)

SOLVENT	%: 80.0000 - 90.0000		
PRODUCT THRESHOLD: 100 ppm	RESIDUALS AND IMPURITIES EVALUATION COMPLETED: Yes	MATERIAL TYPE: Polymeric Material	
RESIDUALS AND IMPURITIES NOTES: Impurities listed above the threshold by Quartz or Pharos databases are noted in this HPD. Residuals and impurities are considered following the HPD Best Practice Guidance, 10.02.17, version 1 “The threshold applied to Residuals and Impurities (R/I) is the same as that applied to intentionally added substances, i.e., 100 ppm or 1000 ppm. Residuals and impurities below the declared Inventory Threshold do not need to be reported on the HPD.” This includes average data declared in the common product database or peer-reviewed scientific articles. For this product, no actual material has been tested. Therefore, residuals and impurities are for informational purposes only and are not a guarantee of presence in the actual building material. Pharos and PubChem (formerly TOXNET) are the main databases for researching potential residuals and impurities. Any R/I above the threshold shall be listed on the HPD; otherwise, if none are listed, then no residuals or impurities are common in that substance above the threshold.			
OTHER MATERIAL NOTES: The actual percentage of composition may be withheld for proprietary reasons.

## Section 4: Accessories

*This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.*

No accessories are required for this product.

## Section 5: General Notes

### ADVANTAGES:

Dissipating Resin  
Enhances Proper Curing of Concrete to Prevent Shrinkage Cracks, Dusting, & Low Strengths  
Durable Film Development Makes Clean Up Easier  
Freeze-Thaw Stable  
Easy removal with EasiKleen EM  
May Contribute to LEED Points  
Low VOC Content

### APPLICATIONS:

Commercial Projects  
Residential Concrete  
Breaks Down Easily to Allow Secondary Flooring Systems  
Interior and Exterior

### PACKAGING:

5 Gallon Pails  
55-Gallon Drums  
275-Gallon Totes
